

Pixelmator for iOS 2.2

Quick Overview

What's New in Pixelmator for iOS 2.2

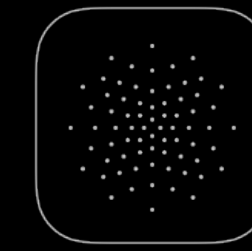

iPad Pro

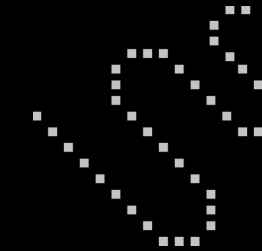

Apple Pencil

16K Support

3D Touch

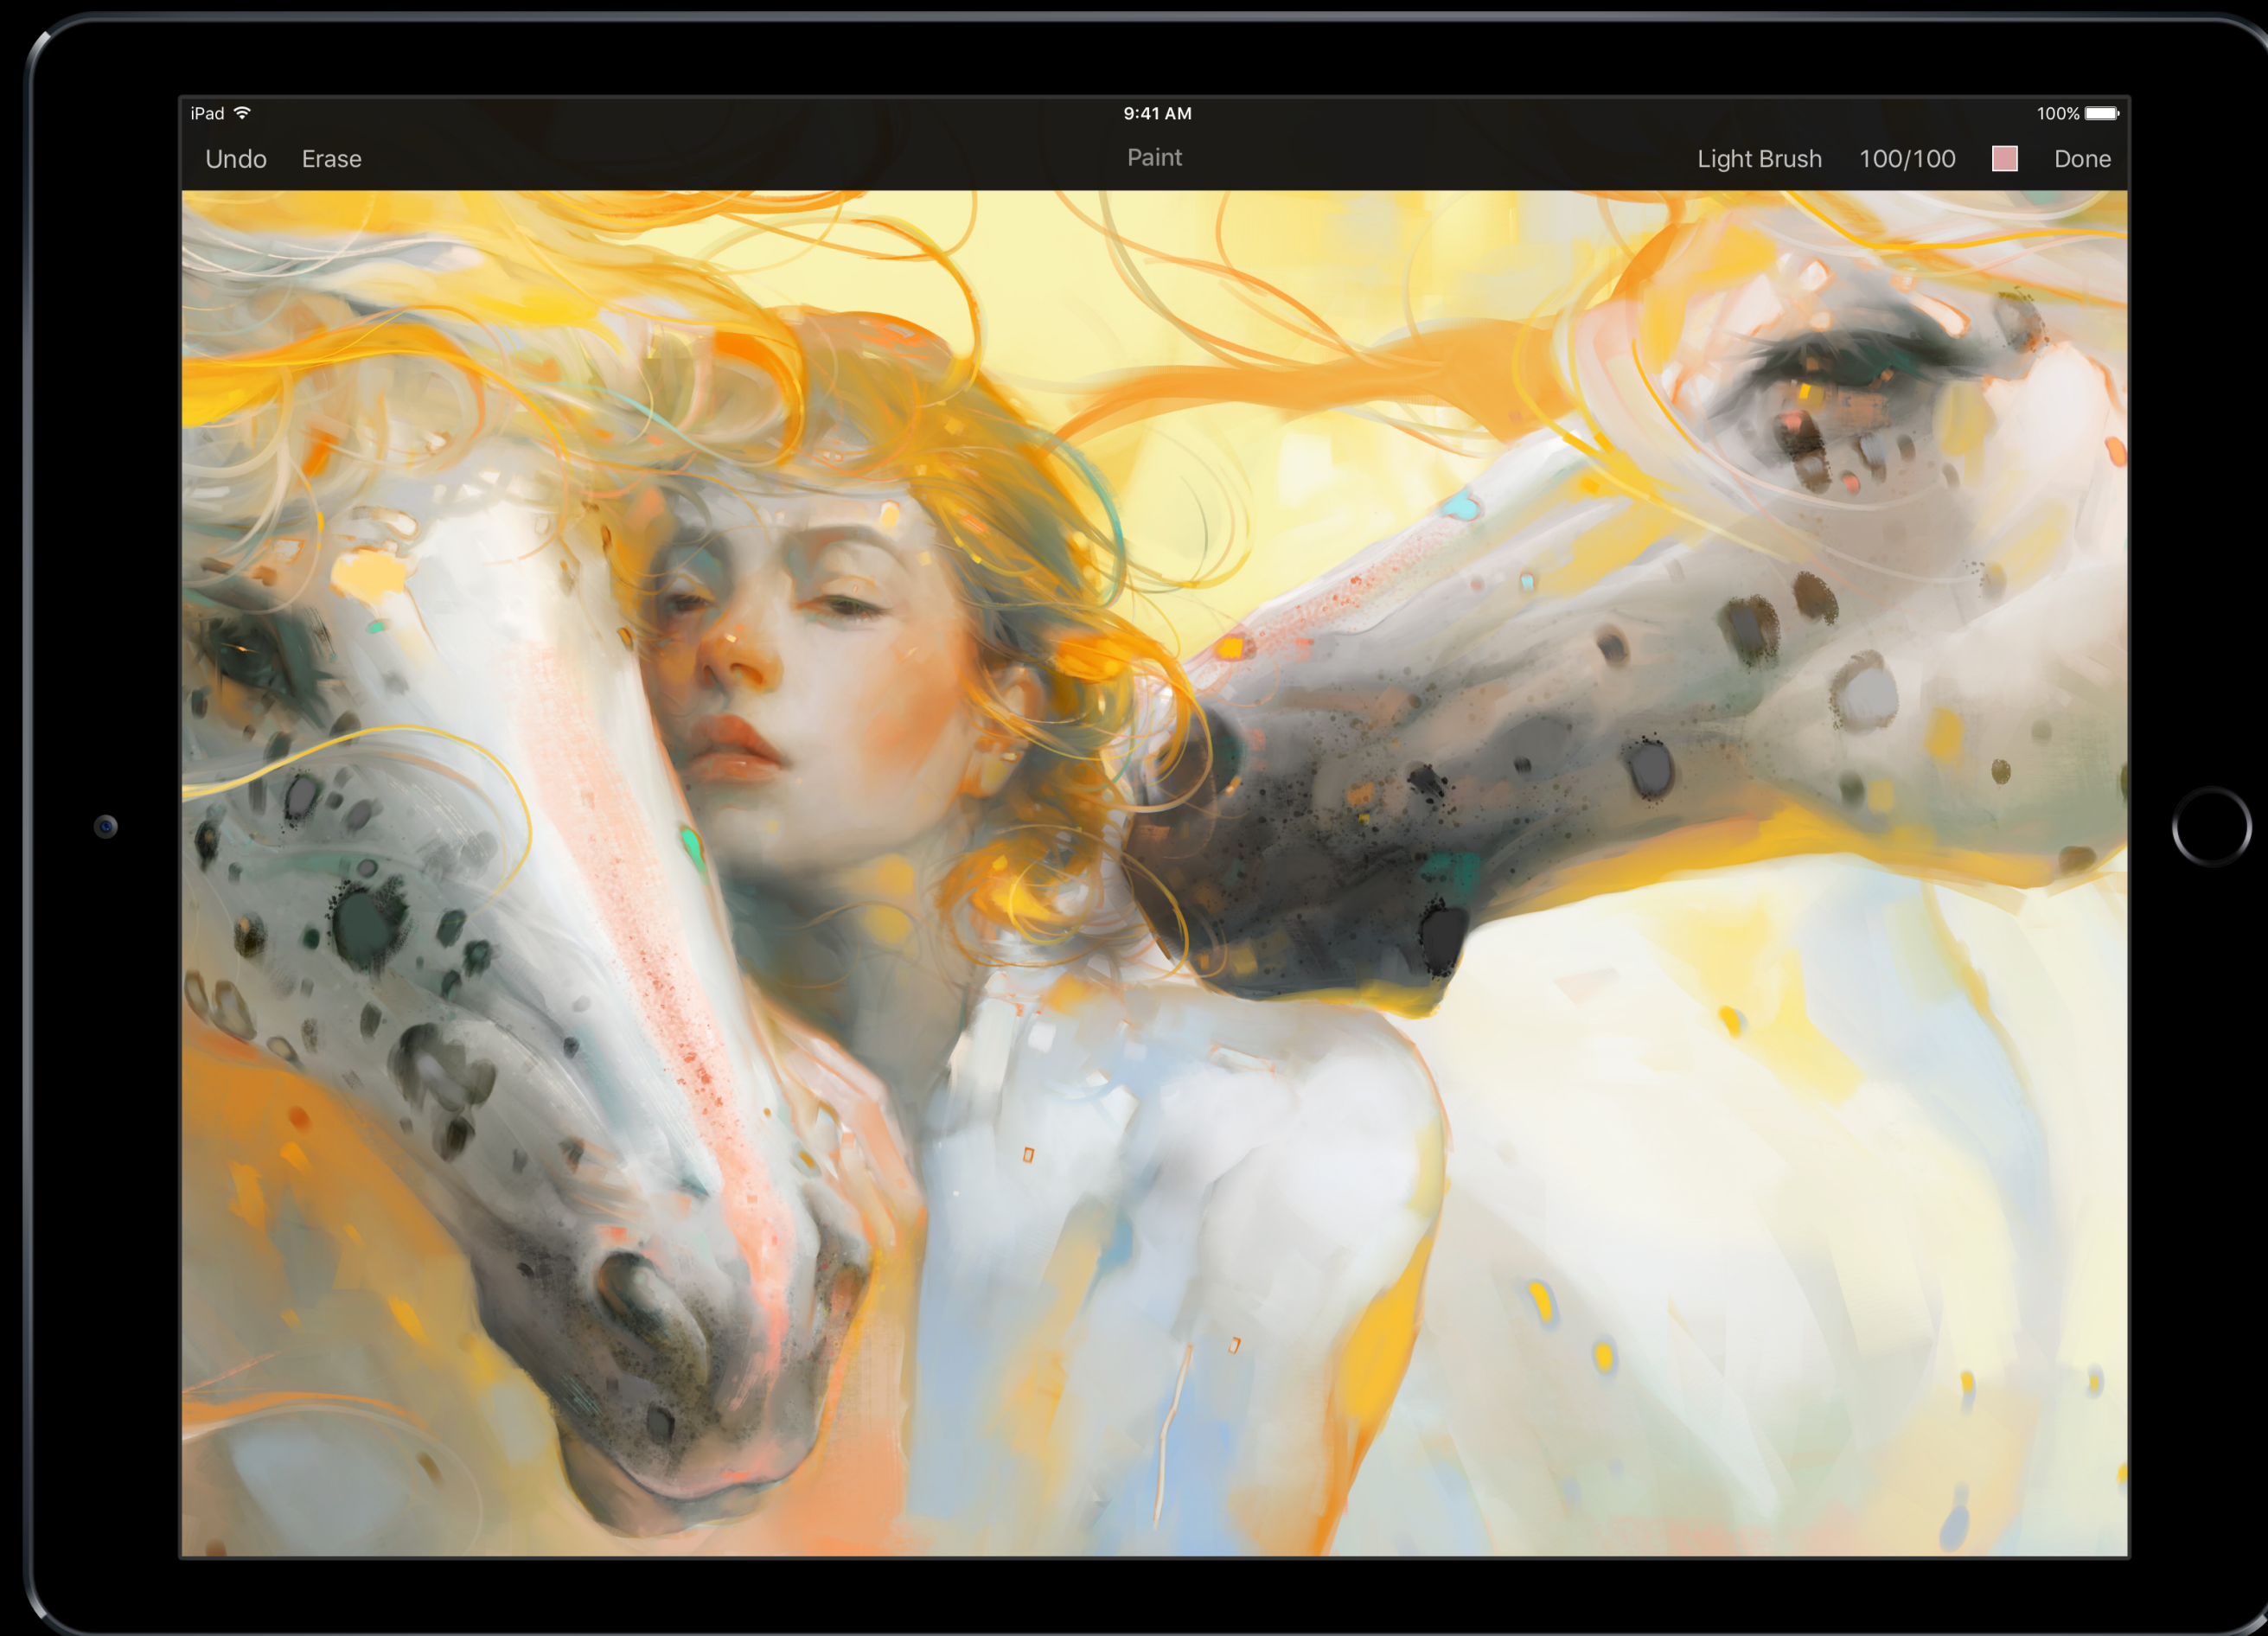

Pixel Brush

iPad Pro Support

Pixelmator for iOS 2.2 brings all of its powerful image editing tools to the new iPad Pro.

Apple Pencil Support

Pixelmator on iPad Pro fully supports the new Apple Pencil, which allows digital artists to work with a much greater precision and makes painting with Pixelmator more natural and fluid than ever.

Apple Pencil Support

Pressure Sensitivity

Press firmly for heavy lines and gently for fine brushstrokes.

Tilt Support

Tilt your Apple Pencil to get thicker and shaded lines.

Acceleration Support

Vary the pace of your stroke to adjust the weight of the line.

Palm Rejection

Use the Apple Pencil while resting your hand on the display.

Tailored Brushes

Paint with over 60 specially tailored brushes.

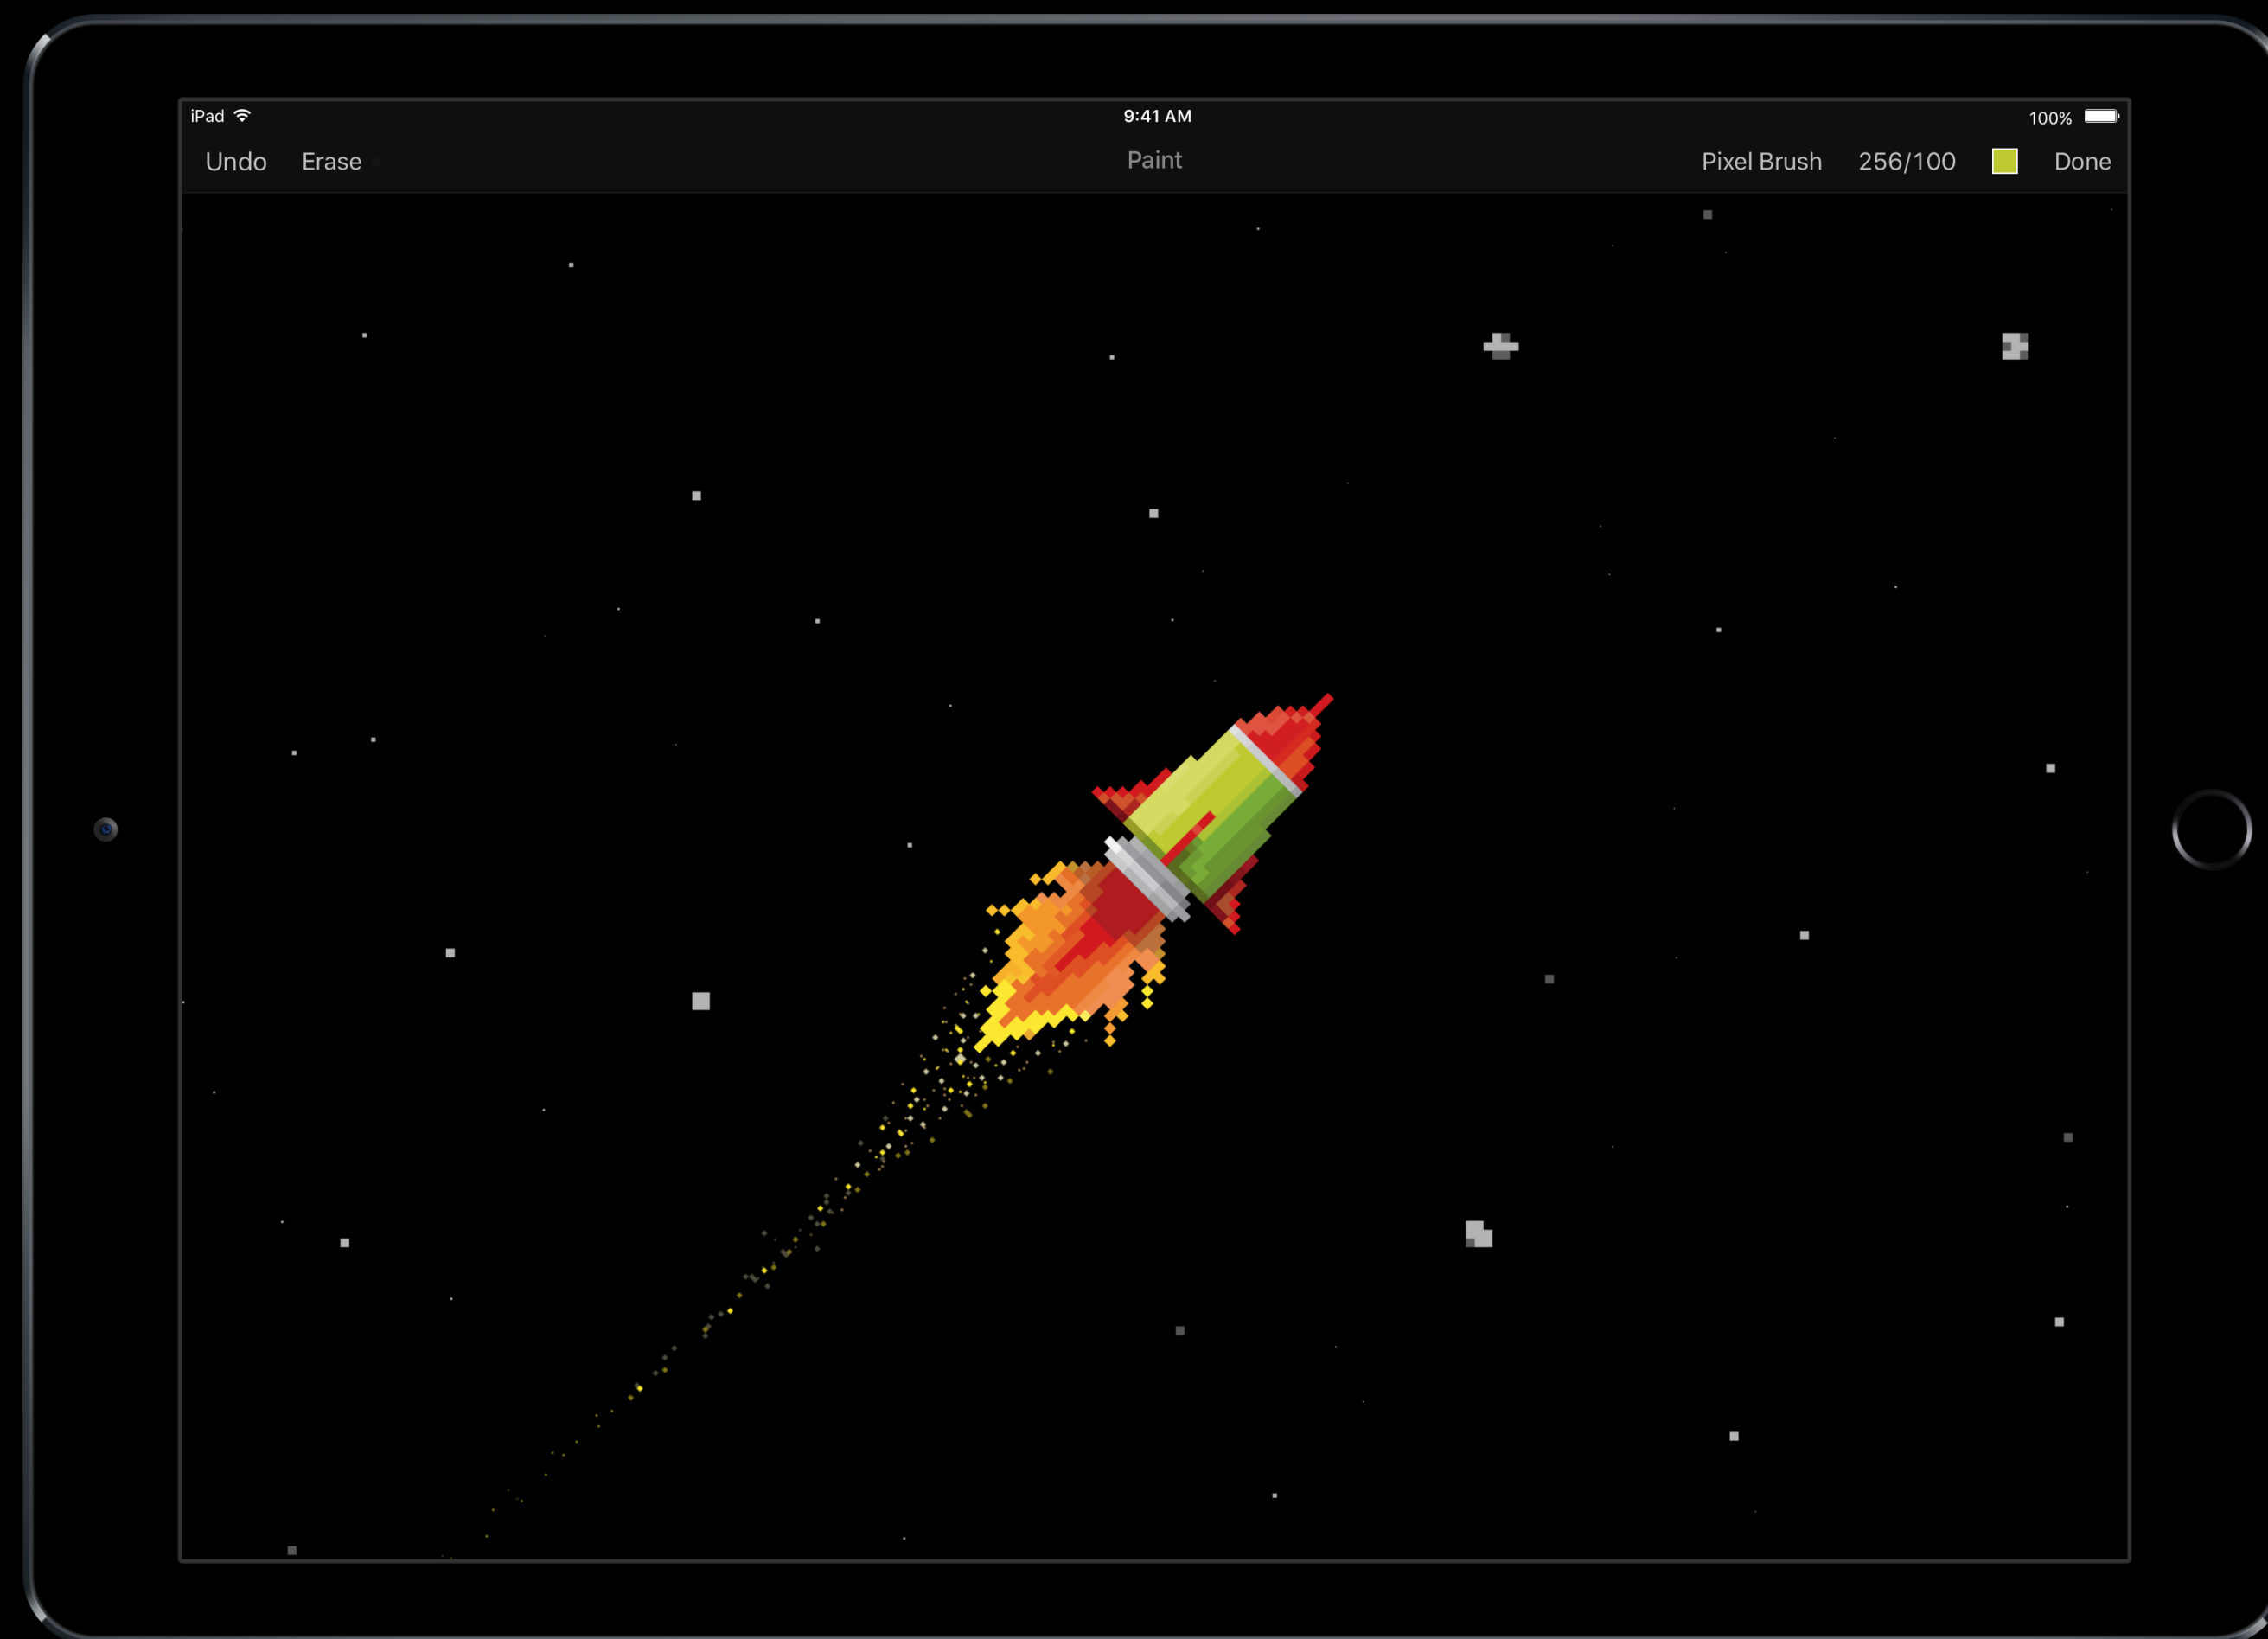

Low Latency Painting

Paint with lightning-fast response and virtually no delay.

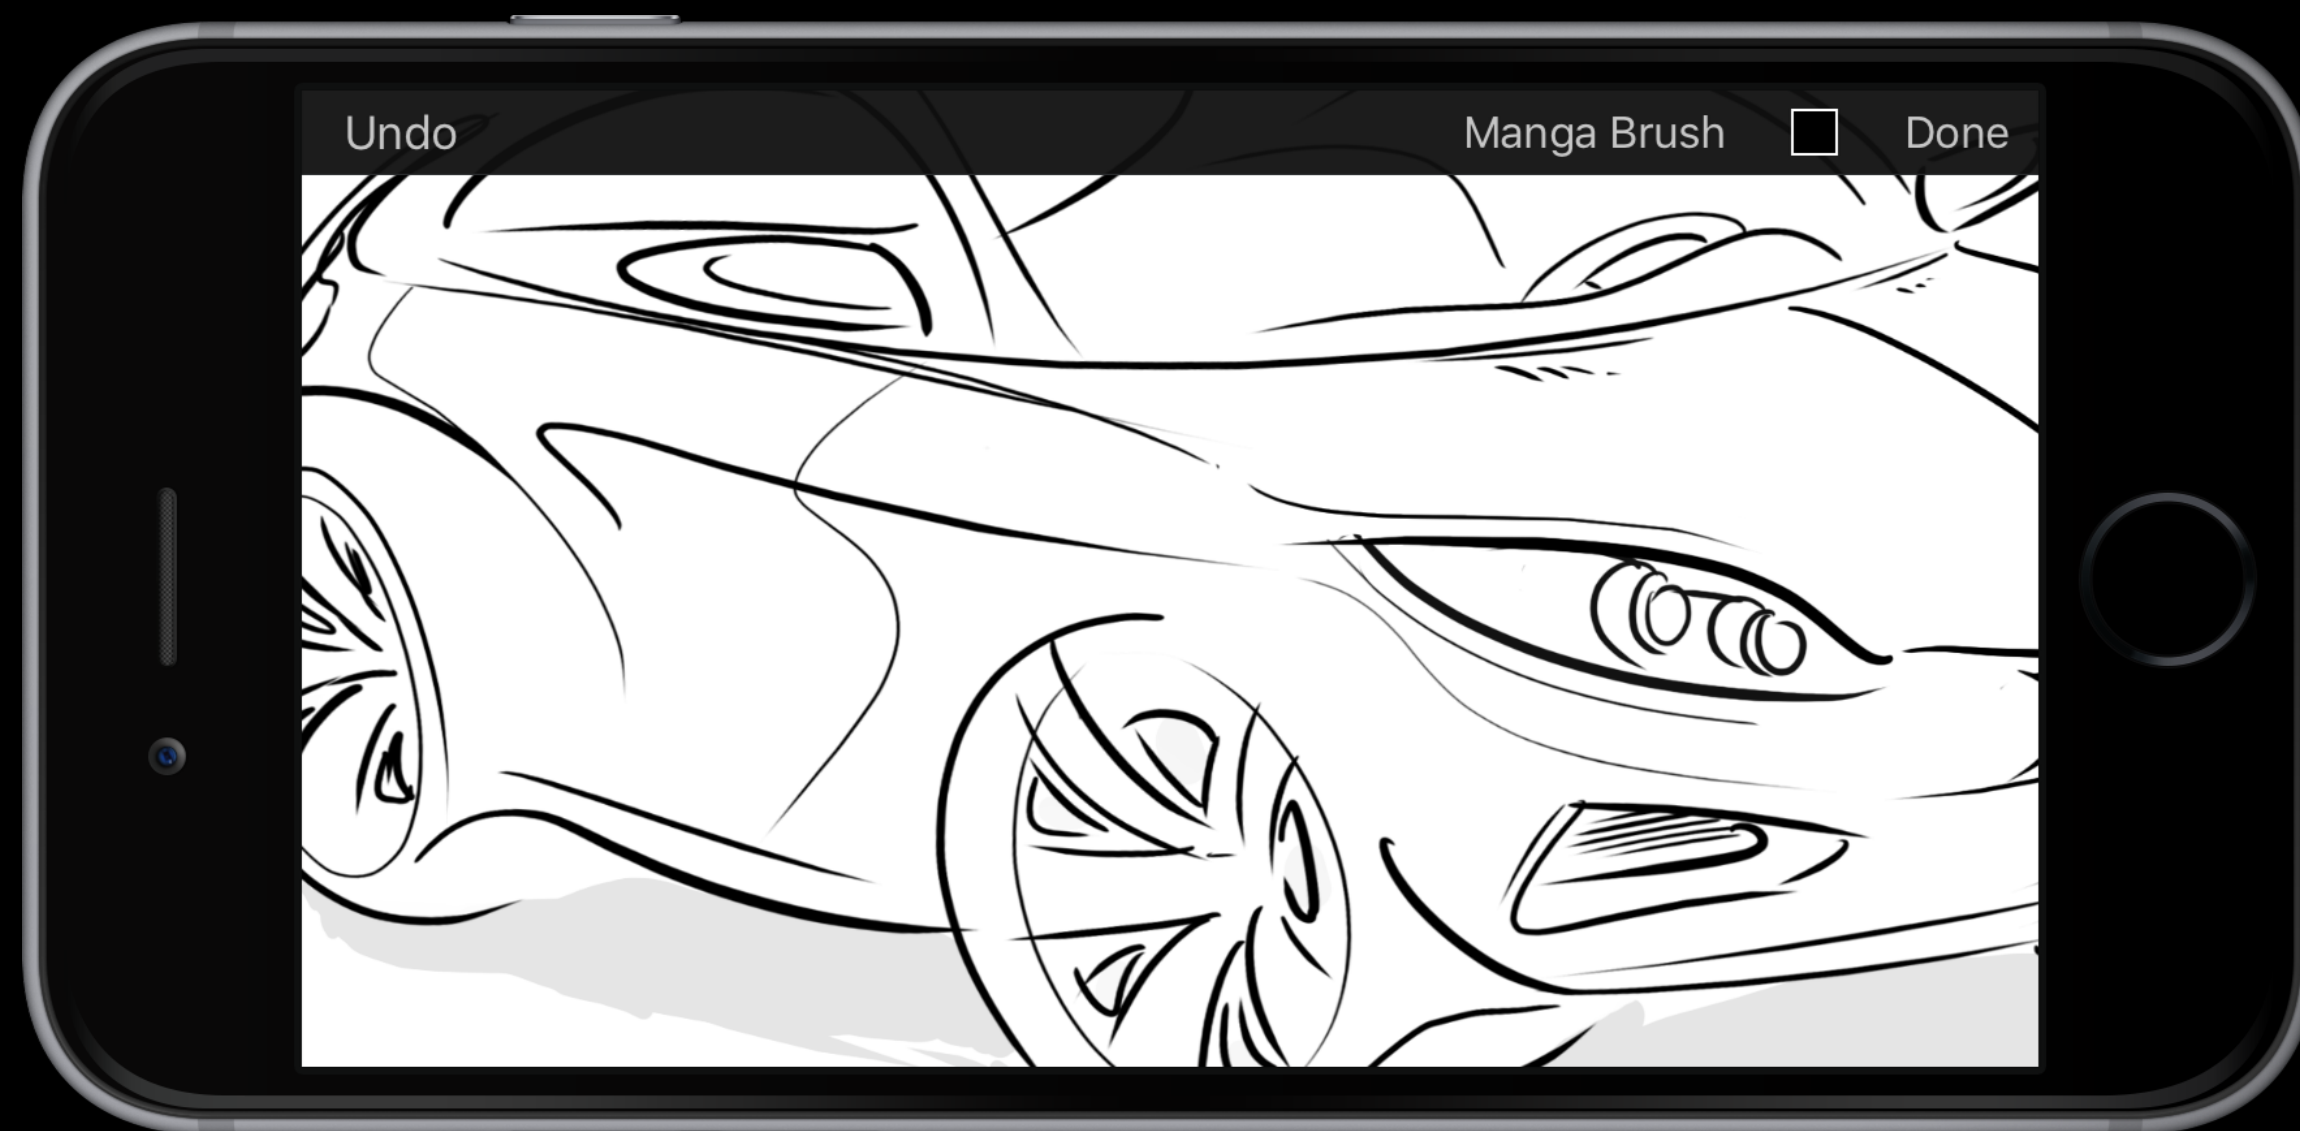

16K Image Support

16K image support allows all imaging professionals to create and edit images up to 100 megapixels, which makes Pixelmator perfect for working with extremely large photos and truly advanced compositions.

Pixel Brush

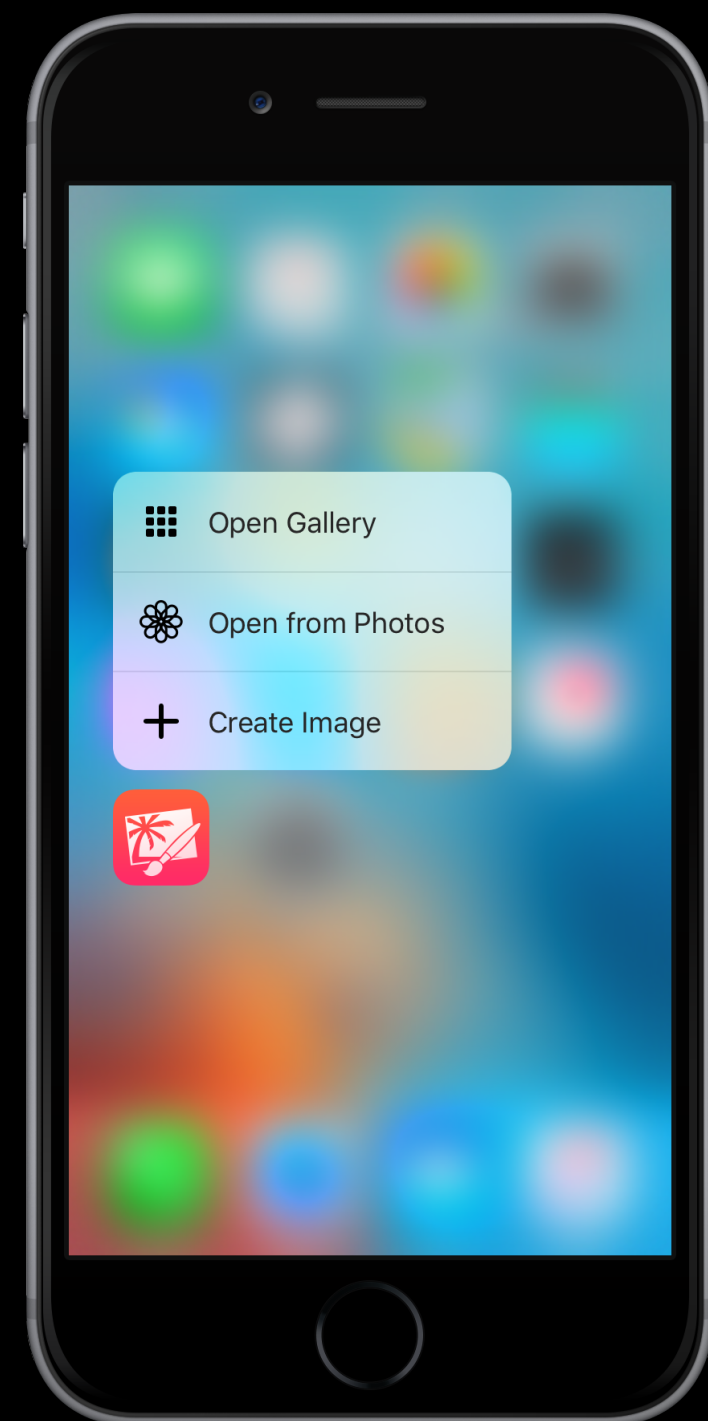

Pixelmator for iOS 2.2 features a collection of artist-designed Basic brushes, including the new Pixel brush, that lets you create stunning pixel art images.

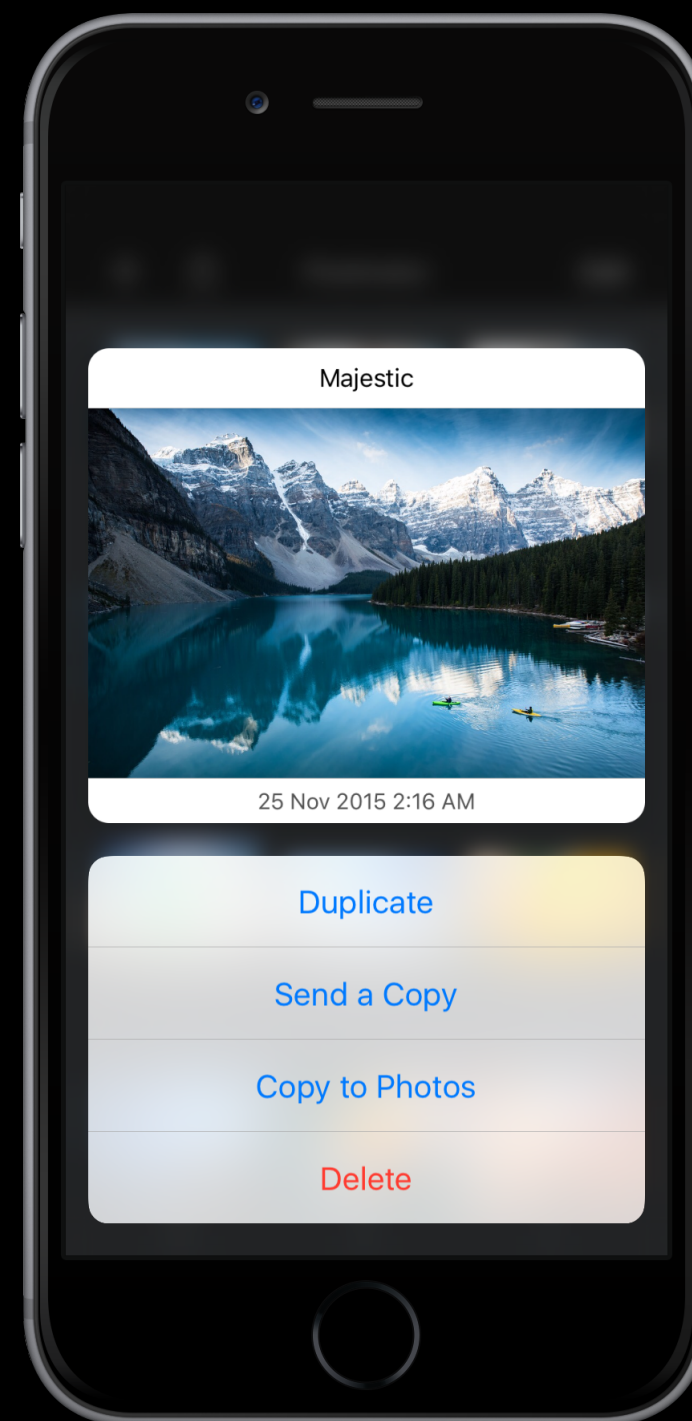

3D Touch Support

Pixelmator on iPhone 6s and iPhone 6s Plus adds full 3D Touch support.
